Subject: Microsoft settlement

I am writing to let you know that in my opinion the proposed settlement between Microsoft and the Department of Justice is a travesty. Microsoft's predatory behavior represents a profound threat to the health not only of the technology sector, in which I work, but of US industry as a whole, and of the United States itself.

If Microsoft can dictate its terms to the US government, who is it that really governs?

I urge you to reinstate the eminently fitting decision of Justice Jackson, and break the company up so as to separate the ownership of the operating system from that of the desktop applications.
